

The motor pool has three regular bikes and two electric bikes. They're easy to use.

Step 1. Make an online reservation through the FAS (Fleets Services) website:
<http://inweb/fleetsfacilities/FSmotorpool.htm>

Step 2: Go to the Seapark Garage and pick up the keys to your bike in the eGo Box.

- Key to padlocked enclosure where helmets are stored.
- Key to U locked bicycle.

Step 3: Prepare to Ride

If this is your first time using an electric bike take a minute to familiarize yourself with the operation.

Unlock the bicycle you have reserved. Take the U-Lock with you so that you may lock the bike at your destination. The U-Lock fits here: (Picture)

Choose and wear a helmet, (City of Seattle law); pant strap is available.

Step 4: Ride the Bike

Activate the “on” button on the Information Center Dashboard.

The Polaris Strive and Meridian E-bikes have a pedal assist drivetrain. As you pedal, you will feel the assist.

Using the thumb throttle will not propel the bike any faster.

Select the Power Assist level, 1 - 3 (button A).

Use the twist grip shifter on the right hand to change gears, like on a regular bicycle.

Twist in (toward you) for lower gear/easier pedaling/slower speeds; twist out (away from you) for higher gear/harder pedaling/faster speeds. **The rider must be pedaling forward whenever shifting gears.**

When you arrive at your destination, always lock the bicycle to a fixed structure, catching the front wheel and frame member at the same time.
